

CROOKED EMPLOYEES MUST GO.....but not to jail..!..

The “moral compass” guiding many employees seems to be not only upside-down, but also sinking into oblivion.

WITNESS:

- More than 400,000 potential fraud investigations at the State of California Unemployment Department. Many are internal employee corruption ignited and sustained.
- Billions of dollars stolen from Federal and State governments by administrative and operational employees collaborating with seasoned criminals.
- Law enforcement officers cheating the public to the tune of millions of tax dollars by falsifying work sheets and time cards.
- Retail store and restaurant employees embezzling and hijacking products/services; the result according to study analysis indicates 25% to 35% inventory shrinkage, and revenue loss from 6% to 12% yearly.
- Brand Name company employees enabling a “black marketplace” pathway for billions of dollars in phony product replicates {knock-offs}.
- Billion dollar per year crooked internet-hacker organizations fueling cyberattacks; fed and sustained by the victim’s employees, who breach trust and “bad-actor” collaborate at all security levels.

While these illegal activities have long been identified and recognized, the recent Covid Pandemic exacerbated the problems, because vigilance suffered while humans were suffering with the virus. Further, the pandemic opened the “economic money valves” to access huge cash pipelines from government, private industry, and not-for-profit enterprises.

While youth moral doctrine, religious training, and effective parenting are all issues when evaluating the REASONS for so-called “moral-compass-degradation”those platforms are the arena of separate experts and commentators. Our proposition and solution addresses HOW to diminish the problem as one key component of a multifaceted community plague. Further, our concepts are designed to be a GAME CHANGER culturally, so the current toxic approach is gradually replaced.

= THE CURRENT TOXIC PHILOSOPHY =

As the title of this proposition infers, the entire implementation within today’s criminal justice system is PENAL ORIENTED. Simply stated, “beat the motivation out of the offender” by way of PUNISHMENT instead of instilling motivation to reform. What is it NOT achieving..?..

- NOT rehabilitation.
- NOT re-training.
- NOT work ethic indoctrination.
- NOT moral mentoring.

- NOT instilling new skills and worker expertise.
- NOT motivating the worker to want substantive improvement.
- NOT recidivism focused; intensive studies are ignored.

In summary, most criminal justice systems are inherently defective because the operating pathways typically incubate amateur wrong-doers into hardened criminals.

WITNESS:

Pulitzer Prize Winner Robert Greene observed thusly -

“We must build a system of care that fosters health and justice, and deconstruct the costly police-and-prisons infrastructure that we foolishly built instead. When the pandemic crisis abates and we have caught our collective breath, we can ask ourselves why we lock-up so many suspects, defendants, and convicts in the first place...AND...whether they all need to be behind bars for the rest of us to be safe.”

He further remarks about the pervasive SUBSTANCE-ABUSE CRISIS in the USA:

Our criminal justice system infrastructure... “led directly to the nation we now inhabit; overwhelmed by serious illness, fear, anger, mutual distrust, and a level of inequity and incompetence that mocks our self-image as Americans...We have in our hands the power to destroy ourselves, and one another, and we seem bent on exercising it.”

WITNESS:

My personal experience after being wrongfully and grievously charged with a felonious crime:

= Excerpt from ALLUS IN TRAUMALAND =

- **“EXTORTION** -

Means setting up outside-the-prison influences to threaten, harass, and steal. There always are prison gangs and ambitious groups preying on the families of prisoners.

Those prison families are **motivated to provide cash, special favors, and material resources to their prisoner relatives and friends.**

My business exposure had fine-tuned my instincts; particularly the rule whereby ‘there is no free lunch’.

My enthusiastic and welcoming cellmates must have a hidden agenda, just like the March Hare during Alice in Wonderland's ambition to extricate from her journey.

Thus began the next stage in my transition from a crucible to a painful cross. The next week would further enlighten me about the cruelties of human slavery; how the UPSIDE-DOWN prison system threatens the public, instead of protecting the public's welfare.

My cellmate hosts were “gang-bangers” committed to every larceny imaginable. They were not only street-smart youths, but also quite industrious. Whatever not known to them prior to incarceration was soon taught to them by the prison population. At this particular prison, there were no “reform and redemption programs”.

Not surprisingly, this is the primary reason those inadequacies undermine the welfare of the general public. A twenty-year-old potentially worthwhile citizen enters prison an amateur lawbreaker, but exits as an educated criminal expert.

So in exchange for my own bunk bed (yes, the concrete floor was the third lounge) my two cellmates thoroughly enjoyed my presence as entertainment. Sheer boredom and innate intellectual curiosity motivated many hours of insightful questions.

Their myriad recipe of criminally educated probing techniques gleaned information to be used for illegal schemes.

An example is prying constantly into my personal circumstances to record names and knowledge about family, friends, and business associates.

These no doubt would represent a trove of jewels passed to outside gang members for purposes of extortion and thievery. Another was searching through my logbook when asleep and extracting anything there. After one night it was obvious. Upset, I had to ask the police security to safeguard the only tangible resource remaining on my person when inside the cave-cell.

**. Their detective activity and jigsaw puzzle degenerated; one of the cellmates asked me to arrange his marriage to my daughter!
His reasoning?**

Because any woman married to the same man for a decade had to be looking for "adventure and revival". AND... Any man married for a decade without mistresses was suspect; my son-in-law must be homosexual; certainly my daughter would be grateful to me when my son-in-law came out of the closet, so my cell-mate would keep her sexually satisfied daily.

Such is the result when prisoners are denied continuous ethical improvement and basic schooling while incarcerated.

-AND-

Boredom breeds insanity!

Irrespective, these "gangstas" had touched a volatile nerve.

Most fathers will understand my repulsion and anger as the stressful days unfolded."

= BACK TO THE BEGINNING =

My personal experience exemplifies our bottom-line summary:current penal infrastructures are incubators for magnified criminal conduct, instead of "healing stations" and long term solutions.....

PROPOSITIONS:

= HEALING {demarcation} STATION #1 =

A process classified as demarcation. This means identifying those CROOKED EMPLOYEES (and all law violators) who commit non-violent crimes. It's critical to segregate so-

called "body-injury-criminals" from the misdemeanor and felony NON violent bad actors.

Prosecutors know innately WHO qualifies; Courtroom Judges are a reliable and copious source because they typically frown about limited alternatives; they will welcome a NEW pathway to gain peace-of-mind about their judgments.

= HEALING {indoctrination} STATION #2 =

A series of educational eye-eye seminars designed to instill motivation and imbue appreciation for a professionally structured "Core Improvement & Vitality Program". These sessions serve to describe and tutor the incarcerated BAD ACTORS pursuant to the skill building and craft teaching agendas. In essence, this stage of the Core Improvement & Vitality Program focuses on persuading the BAD ACTORS whereby the benefits are obvious, valuable, and long lasting.

= HEALING {cottages concept} STATION #3 =

Educational sessions designed to instill collaborative and participative motivation. The COTTAGES DOMICILE is presented as a humane and comfortable abode, not a jail/prison environment. Slave conditions and dungeons are addressed and totally rejected, so the BAD ACTOR accedes to the benefits of the Core Improvement & Vitality Program.

= HEALING {menu revelation} STATION # 4 =

Educational sessions designed to describe and illuminate. The BAD ACTORS are introduced to the skill building topics

and the crafts tutoring available to all the participants in the Core Improvement & Vitality Program.

= HEALING {menu evaluation} STATION # 5 =

The BAD ACTORS study their program menu preferences. This is a process of elimination because many selections will be emotional instead of intellectual. The parties must comprehend the positives and negatives of their program menu preferences. For instance, elderly and retired and homeless persons should serve as MENTORS. However, there certainly will be BAD ACTORS who already have skills and crafts capabilities; these program participants can accelerate to the paid hourly jobs available and sponsored within the Core Improvement & Vitality Program.

= HEALING {menu selection} STATION # 6 =

The BAD ACTOR selects the endeavor(s) to commit and pursue within the Core Improvement & Vitality Program.

The menu from which the selection(s) has occurred is:

CRAFTS TRAINING MENU -

1. Ceramic Products
2. Glassware Products
3. Fiber + Textile Clothing
4. Flower Arrangements
5. Leatherwork: furniture and hi-demand products
6. Houseware Products
7. Fashion Design and Execution

8. Needlework Products
9. Paper Craft Artistry
10. Food Menu Preparation, Cooking, Serving
11. Nutritional Cooking Methodology

SKILL DEVELOPMENT MENU -

1. Micro-farming 24/7
2. Forest & Park Ranger Training
3. Solar & Wind Energy Technicians
4. CAREGIVING Retired & Elderly Patients
5. CAREGIVING Homeless Persons (all ages)
6. CAREGIVING - Homeless Person Administration -
7. Plumbing/Roofing/Carpenter/Electrical Trades
8. Alluvial House Foundations (Cottages)
9. Alluvial Wall & Decking Structures (Cottages)
10. Disaster Technical Assistant Training
11. Disaster Cleanup Crew Techniques
12. Medical Emergency Technicians

NOTE: all skills are injected at the Apprentice Level and all evolve into the Journeyman Level (JOB QUALIFIED).

= HEALING {instructor staffing} STATION # 7 =

These training courses and sessions require competent instructors. First and foremost, staffing selections should emanate from current "jailhouse" employees. There are compelling arguments to deploy existing security personnel whenever feasible, not least of which is specialized lawbreaker handling.

It's reasonable to assume that voluminous current prison guards and support staff will be stimulated by the merits inherent at the Core Improvement & Vitality Program. For instance, it is well known whereby jail and prison security personnel experience "career/burnout fatigue" rapidly due to repetition and adverse public perception. Conversely, the Core Improvement & Vitality Program triggers career elevating opportunities, prominence, pride-in-performance, and discernible dedication to the "public good".

Management selecting instructors should also target so-called HOMELESS PERSONS who are mentally stable. Since the Core Improvement & Vitality Program demands "real-world" expertise, homeless and retired persons should be recruited to lend skillsets that long-life experiences convey.

Further, this plan is synergistic because homeless and elderly persons are often seeking mental stimulation, plus psychological benefit (self-worth-enhancement).

When additional and supplemental instructors are required, then conventional classroom teaching and educator resources should be accessed.

IMPORTANT

It is anticipated that private industry and not-for-profit organizations will sponsor and partially underwrite the educational activities. Simply stated, corporate citizens and charitable groups comprehend the dividends derived from community upgrades, and cultural investment. Further, the

skills injected translate into “ready-to-hire” workers who possess desirable and favorable moral standards.

= HEALING {ethical conduct} STATION #8 =

Religious doctrine and worship ceremony practitioners must be recruited to provide CORE VALUE presentations. While these activities are strictly elective, they should be promoted and encouraged.

It’s strategic to operate ethical conduct indoctrination sessions as less visible and low-key. However, there is no doubt that the Core Improvement & Vitality Program targets moral standards, and mental maturity tool-kits.

= HEALING {mental disorder} STATION #9 =

Criminologists portend more than fifty (50%) of illegal activity is committed by offspring (DNA) of lawbreaking families. Further, Narcissism is chronic among BAD ACTORS. A large percentage of criminal behavior has SUBSTANCE ABUSE as the nexus.

These mental disorders are not therapy conditions; instead they are brain deficiencies. It’s vital to employ competent medically licensed psychiatrists for purposes of treatment and possible long-term-cure. Unlike ethical indoctrination which is elective, medical treatment must be mandatory.

= HEALING {income benefit} STATION #10 =

The Core Improvement & Vitality Program members are paid Apprenticeship wages in accordance with federal

guidelines. There is no “disparity” compared to Journeyman wages since ROOM + BOARD are the tangible and ancillary wage enhancement paid to the worker. Cash wages are either disbursed to a marriage partner, legally supported children, or secured in a bank savings account until the member exits the incarceration stage.

= HEALING {Cottages} STATION #11 =

The COTTAGES utilized within the Core Improvement & Vitality Program are the domiciles provided to the BAD ACTORS while incarcerated. They are designed to be functionally comfortable worker platforms. For instance, every Cottage has a MICROFARM growing on all sidewalls. The roof contains SOLAR & WIND devices so the dwelling is self-powered and absent costly utilities. All BAD ACTORS are required to maintain and constantly improve the tangible benefits from the Cottages Operating Recipe. Failure by the occupants translates into unhappy moments (hot-cold-dark-zero electricity environments). This concept triggers precious household management expertise {for eventual usage by BAD ACTORS after converting into productive persons}.

The COTTAGES are built and erected by the BAD ACTORS. The highest paid apprenticeship jobs are enjoyed by those workers who reliably perform.

= HEALING {synergistic cornucopia} STATION #12 =

The COTTAGES are provided for BAD ACTOR occupancy, and also HOMELESS PERSONS who are displaced, houseless, vagrant, destitute, etc.

- The Core Improvement & Vitality Program is synergistic.
- Core Improvement Members (BAD ACTORS) monitor and assist Homeless-Person occupants.
- Homeless-Person occupants SHEPHERD and mentor members within the Core Improvement & Vitality Program.
- BOTH segments represent potential managers and workers in the “homeless-infrastructure” marketplace.
- There are elaborate and intensive SHELTERING programs igniting as a result of state and federal legislature funding.
- ALL these somewhat disparate programs have one common denominator, which is:
- The unequivocal necessity for TRAINED ADMINISTRATIVE + OPERATING TECHNICIANS + task workers to support the infrastructure necessary to execute SHELTERING programs successfully.

SUMMARY:

The herein composed Core Improvement & Vitality Program progressively and productively describes SOLUTIONS, not fantasies. It is a sophisticated yet practical “century enduring” GAME CHANGER.

TO REFINE THE OPENING HEADLINE TO THIS NARRATIVE:

CROOKED EMPLOYEES MUST
GO.....

BUT NOT TO JAIL.....

INSTEAD TO THE "COTTAGES"
AND THE CORE IMPROVEMENT
& VITALITY PROGRAM -

= END OF THE BEGINNING =
